Pro Taxking Advisory Private Limited   08/2021 – 09/2022 | Navi Mumbai, India
Full Stack Developer
- With 1.1 years of dedicated experience in Python, Django, HTML/CSS, JavaScript, Bootstrap, and MySQL.
- This experience was gained during my tenure at a dynamic startup in the IT industry, contributing to the innovative vision of Venturebuddy (www.venturebuddy.io).
- My responsibilities included not only building features but also testing and assuring the functionality of crucial components such as business valuations, analyzing Balance Sheets, P&L statements, and Projection.

📂 PROJECTS

HRMS - Human Resources Management System   05/2022 – present
Python, Django Rest Framework, Angular, MongoDB
- I took a lead role in the development of the project's backend using Django REST Framework. I have developed APIs to provide seamless communication between the backend and front end.
- Build JWT Token which helped to authenticate and authorize the API calls and users.
- Technologies - Python, Django Rest Framework, MySQL

Business Consultancy (venturebuddy.io)   08/2021 – 09/2022
Python, Django, HTML/CSS
- I played a pivotal role in both developing and deploying the Venturebuddy web application (www.venturebuddy.io).
- a financial tool designed to calculate business values, projections, and balance sheets.

- Leveraging my expertise in Python, JavaScript, HTML/CSS, Bootstrap, MySQL, and Django, I contributed to its end-to-end development and ensured its successful deployment.

Personal Voice Assistant Application   03/2020 – 10/2020

Python Desktop Application
- Desktop Application is an intelligent personal assistant application for Windows PC, developed entirely in Python.
- It enables users to interact with their computers using voice commands, providing a convenient and hands-free experience.
